UI + UX design
Branding + Identity
Print production
Front-end web development
Digital photography + video
LMS content administration

EXPERIENCE

April 2018–Present

Senior Interactive Applications Developer nThrive Education

Role responsibilities in addition to those listed under Interactive Application Developer:

Designer and maintenance liason for a suite of LRS TinCan active microsites and single page web applications.

Leads interactive education content R&D, process optimization, and cross-training team members as processes evolve. Regularly makes innovation contributions to industry-leading content with highly dynamic, animated, mobile-responsive, and user-centered front-end interface design.

Recently optimized suite of educational SPAs with Lodash framework-based client side preprocessing templates, reducing the server-side file quota and client-side load times.

Skills required

Javascript + JSON
Lodash + JQuery
Regular Expressions (JS)
Adobe Photoshop
Adobe Illustrator
Adobe Animate
Create.JS
Vyond + Adobe Premier Pro
Adobe After Effects

Feb. 2013–April 2018

Interactive Applications Developer OpenSketch | nThrive Education

Develops online education solutions with emphasis on interactivity, mobile usability and creativity

Works closely with content administration manager in the construction and enrollment of courseware

Responsible for production of interactive courseware, printable resources, and online assessments

Promoted LMS upgrade transition by writing and constructing a software documentation reference site

Responsible for audio editing and integrity for large scale on-demand webinar offering

Oversees development of modular learning interactions used within proprietary courseware format

Developed online self-service form for clients to distribute enterprise-level mobile app access
